

CORRECTIVE AND PREVENTIVE ACTION REPORT

■ DRAFT — System-generated. Requires qualified human review before regulatory use.

Study ID	ONC-2024-001	Risk Band	High
Protocol Version	3.1	Risk Score	73.2 / 100
Site ID	SITE-017	Total Deviations	41
PI	Alexandra Le	Report Date	2026-09-15

Deviation Summary

Deviation Type	Count	Affected Patients	Severity Distribution
eligibility_violation	21	16	Major: 21
missed_visit	7	6	Major: 4; Minor: 3
out_of_window	4	4	Minor: 3; Major: 1
late_data_entry	4	4	Major: 2; Minor: 2
dosing_deviation	3	3	Major: 3
missing_assessment	1	1	Major: 1
prohibited_medication	1	1	Major: 1

Root Cause Analysis

Site SITE-017 has 41 detected deviations (risk band: High). Predominant deviation types: eligibility_violation, out_of_window, missed_visit. Detailed root cause analysis requires qualified review. [DATA REQUIRED]

Immediate Corrective Action

Immediate actions: (1) Notify Principal Investigator of all open deviations. (2) Review all Major deviations with site staff within 5 business days. (3) Correct or document all affected CRF entries per sponsor SOPs. [Responsible party and completion date: DATA REQUIRED]

Preventive Action

Preventive actions: (1) Conduct targeted retraining on protocol requirements. (2) Implement visit scheduling reminder system. (3) Increase monitoring visit frequency. [Detailed actions require site assessment: DATA REQUIRED]

Effectiveness Check Criteria

The CAPA will be considered effective if: (1) Zero repeat deviations of the same type occur over the next 90 days. (2) Data entry lag reduces to ≤3 business days. (3) Site risk score decreases to Medium band or below. [Verification timeline: DATA REQUIRED]
